

Night 13: told one sentence,
writes a prediction

Day 14: the prediction is right

Night 14: the update retracts it
written the same night

Tomas is unwell and staying home. Expect him in bedroom_1 or living room during day/evening, not office. His laptop/mug/charger likely in bedroom_1 or living, not office desk.

office: 0

bedroom_1 7 · living 4 · office 0

Tomas works from the office during the day (seen 14:08)... The 'unwell' hypothesis from Day 13 is not supported by Day 14 activity.

Tomas's glass is on the bedroom nightstand during the day (seen 08:07-15:12).
